Excerpt:

Loose filament spool holder (for DiamondAge and probably others). No screws, glue etc. required). Inner diameter is just so it fits the spool holder of a stock UM1 (UM2?)

Description:

My version of a filament spool Holder for the DiamondAge (and potentially other) loose filament.
No bolts, no glue required.
Tolerances are not really finetuned, but with a little exacto nife work it's ok. Just print 4 x arms, 1 x cap, 1 x inner and 1 x main.
Insert 3 arms at first, then mount the filament spool and insert the 4th arm, press in the inner piece and screw the cap on. Done.
Should just fit the UM1's spool holder and also should clear the extruder mechanism on the stock UM1.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/loose-filament-holder-v1> because those may have been be updated. Also, there you can interact and provide praise and/or feedback.
